

TEJA SWAROOP KORUPOLU

APPLIED AI ENGINEER | LLM SYSTEMS | PYTHON | LANGGRAPH | TYPESCRIPT

Hyderabad, India | +91 85238 03643 | tejaswaroop123456@gmail.com | linkedin.com/in/tejaswaroop999

PROFESSIONAL SUMMARY

Applied AI Engineer focused on building production LLM applications, agentic workflows, scalable APIs, and full-stack products. Hands-on with Python, TypeScript, LangChain, LangGraph, React/Next.js, Node.js, and modern LLM APIs, with experience spanning AI model evaluation, backend systems, automation, and commercially launched AI products.

TECHNICAL SKILLS

AI / LLM: LangChain, LangGraph, LLM Integration, Agentic Workflows, Prompt Engineering, Claude API, NLP, TensorFlow, PyTorch, Computer Vision

Languages: Python, TypeScript, JavaScript, C++, C

Backend / Frontend: Node.js, NestJS, Flask, REST APIs, React.js, Next.js, Tailwind CSS

Data / DevOps: MongoDB, Supabase, Docker, Git, GitHub Actions, Vercel, Netlify

EXPERIENCE

AI Training Data Engineer | Turing

Aug 2025 - Present

Remote

- Designed complex competitive-programming and algorithmic tasks to evaluate LLM reasoning, code-generation quality, robustness, and failure modes.
- Generated and validated 200K+ test cases covering correctness, edge cases, and adversarial scenarios for AI model evaluation.
- Created structured reasoning and validation data for LLM training/evaluation workflows while maintaining 100% solution-correctness benchmarks.

E-Commerce & Digital Growth Manager | Confidential D2C Wellness Brand

Mar 2026 - Present

Hyderabad, India

- Built and commercially launched a production AI application using Claude API, React, and Next.js to generate personalized astrology/numerology reports.
- Designed the end-to-end workflow from structured user inputs and AI generation to the customer-facing delivery experience.
- Supported growth beyond INR 28L in gross sales with 700%+ growth in orders and returning customers; managed Shopify, analytics, experimentation, and product-growth workflows.

Co-Founder & Lead Developer | FourHead Socials

Aug 2025 - Present

Remote

- Architected and built a full-stack clinic platform with appointment booking, admin dashboards, and automated WhatsApp/SMS notifications.
- Owned backend architecture, database design, booking workflows, notification services, deployment, hosting, domains, and production infrastructure.
- Built software and automation solutions from client requirements through production while working across software development, AI automation, and digital-growth initiatives.

Software Engineer | CamelQ Software Solutions Pvt Ltd

Feb 2025 - Aug 2025

Hyderabad, India

- Designed and implemented scalable REST APIs for distributed applications, with emphasis on reliability, performance, and fault tolerance.
- Built low-latency backend services and application workflows; contributed to engineering improvements that reduced feature rollout time by approximately 20%.

FOUNDER & AI PRODUCT WORK

Founder & AI Product Engineer | Infrona

Aug 2024 - Present

Remote

- Built AI applications, automation systems, dashboards, chatbots, resume-analysis tools, and lead-generation products using modern full-stack and LLM workflows.
- Developed LLM workflows using LangChain/LangGraph and modern model APIs, owning architecture across frontend, backend APIs, databases, AI integration, infrastructure, and deployment.
- Prototyped and launched 3 AI products in under 3 weeks using AI-assisted engineering workflows to accelerate iteration and delivery.

ADDITIONAL ENGINEERING EXPERIENCE

Full Stack Developer | Schemax Export Techno Craft Pvt. Ltd

Jan 2024 - Jan 2025

Visakhapatnam, India

- Developed React/NestJS applications and REST API integrations, improving frontend responsiveness and scalable backend service delivery.
- Improved API integration efficiency by approximately 20%, enhancing overall application performance.

Artificial Intelligence Developer | Internship Studio

Jun 2024 - Dec 2024

Remote

- Built Python/Flask backend services and TensorFlow-based ML pipelines for AI and data-processing workflows.
- Optimized data workflows for larger datasets and contributed to machine-learning experimentation and analysis.

SELECTED PROJECTS

AI-Generated Personalized Reports | Claude API, React.js, Next.js

- Built and commercially launched an AI-powered personalized-report application that transforms structured user inputs into generated customer reports.
- Integrated the model workflow into a production React/Next.js experience and supported the complete user-to-output product flow.

AI-Powered Resume Analyzer | Python, Flask, TensorFlow, NLP

- Built an NLP-based application that matches resumes against job descriptions and generates targeted improvement suggestions.
- Implemented backend processing and ML/NLP workflows for extracting and comparing resume/job-description information.

E-Commerce Platform | React.js, Node.js, MongoDB, Stripe API

- Built full-stack e-commerce workflows covering authentication, product/catalog flows, REST APIs, payments, and product recommendations.
- Integrated Stripe payment flows and backend services with a React-based customer experience.

EDUCATION

B.Tech, Computer Science and Engineering | Andhra University College of Engineering

2019 - 2023

CGPA: 8.4 | Visakhapatnam, India
